Windows Small Business Server 2008 is designed for small businesses. It works perfectly with HP technology; it is built on Microsoft best practices, and delivers a comprehensive network at an affordable price. Here's where a server can help. With the right server solution, you can share resources, such as internal files, printers, fax machines, Internet access, e-mail, contacts and calendars, in a more secure manner. And you can keep your network operating at peak performance so you can simplify daily activities and save time and money.

A simple yet feature-rich IT environment based on SBS 2008 and HP ProLiant servers can help your organization become more productive.

- Grow business capacity by enabling your employees to work virtually anywhere at any time
- Seamlessly connect with customers, vendors and suppliers
- Enhance your market presence by creating external web pages and advertising online

Top-selling HP ProLiant servers have advanced features to meet the specific needs of small businesses with remote or unmanaged sites.

The offered HP ProLiant ML 350 G6 Server has the following characteristics:

- HP ML350T06 E5520 SFF Base EU Svr
 - ProLiant Server ML350 HW Supp
- HP 146GB 3G SAS 10K 2.5in DP ENT HDD
x 2
- HP 256MB P-Series Cache Upgrade

This entry-level IT infrastructure solution delivers the right technology at the right price. And if you need to administer remote or unmanaged sites, you can extend your solution with optional remote management capabilities or go for a more advanced IT infrastructure solution.

Designed specifically for small businesses (maximum coverage of 75 users or devices), Windows Small Business Server 2008 is an affordable, integrated server solution that helps you protect business data, increase productivity and stay connected with customers. By providing many of the features used by larger companies—e-mail, internal websites, remote access, support for mobile devices, file and print sharing, antivirus and anti-spam technologies, backup and restore, and Internet connectivity—Windows SBS 2008 gives you the tools you need to help increase productivity and grow your business capacity.
